

PRODUCT CARE INSTRUCTIONS

TEXTILES

Care for textiles by vacuuming or lightly brushing.

Rotate and flip cushions when vacuuming for even wear.

Keeping textiles away from direct sunlight.

The nap of high pile textiles (mohairs & velvets) may become crushed or lose its original pile height. We recommend light steaming to lift the pile to its original height. The textile should also be brushed with a de-linting brush to maintain its pile.

Water based or solvent cleaner may cause discoloration or staining.

We recommend that stained or soiled textiles be professionally cleaned.

LEATHERS

Leather is a soft porous material that is sometimes uncoated. It can easily absorb liquids and oily substances. Avoid saturating the leather with lotion or water.

Care by dusting and lightly vacuuming.

Keep leathers away from direct sunlight and heating vents. Leathers are a natural, "living" material that breathe and move as they wear.

We recommend that stained or soiled leathers be professionally cleaned.

VELLUM

Vellum is a natural parchment produced from calfskin, lambskin, or kidskin. As it is a skin, there are naturally occurring variations in pattern, color, and texture, which may be noticeable in side by side panels. A clear coat of sealant is added to protect the vellum.

Care for vellum by wiping gently with a damp to dry soft cloth, making sure that the skin is completely dried.

Keeping vellum away from direct sunlight and heating vents. Vellum is a natural, "living" material and breathes and moves as it wears. Vellum may also darken over time.

We recommend that stained or soiled vellum be professionally cleaned.

METALS

Never use cleaners with alcohols or solvents on metals.

Only used fine cotton or extra soft cloths.

We recommend that tarnished metals be professionally cleaned.

CAST BRONZE

Cast bronze pieces are treated with a patina that gives each piece its distinctive color. Although bronze is extremely hard and lasts for centuries, the patina is the most delicate element. Its long-term beauty depends upon proper placement and care.

Clean by using a dry or slightly dampened cloth or a vacuum brush. If soiled, use a light soap with luke-warm water. Wipe clean with a damp dry cloth. Dry with a clean cloth to avoid water spots.

PATINA METAL

Clean with a very soft, dry cloth or breathe onto a soft cloth then rub gently in the direction of the patina. Do not use abrasive cloths or cleaners as this may scratch or damage the finish.

WOOD & LACQUER

Wood & lacquered pieces have been stained and/or polished to bring depth and beauty to each finish. Although most are protected with either a clear coat or wax, they are still susceptible to wear.

Care for pieces by dusting regularly with a soft cloth.

Maintain wood and lacquer by not placing near heaters and air conditioning units to prevent over-drying or exposure to excessive moisture. Avoid extreme humidity changes in your home, as extremely dry air can cause wood to crack and lacquer to lift. Do not place/leave hot or moist objects directly on the wood. Rubber or plastic left on the wood finish can also damage the finish.

Clean by using a dry or slightly damp soft cloth. Follow by polishing with a dry soft cloth. Do not use commercial, heavy-duty polishes or waxes, as they can yellow light finishes.

We recommend that stained or soiled wood or lacquer pieces be professionally cleaned or refinished.

GLASS & CRYSTAL

Glass & crystal can be cleaned by wiping with a soft damp cloth or glass cleaner with no additives. Apply glass cleaner to a soft cloth rather than directly on to the fixture to avoid overspray that may damage other finishes.
